The Department of Chemical Engineering and Biotechnology at Cambridge University is one of the UK's leading research departments, ranking highly in both national and international University league tables. The department's research strategy responds to the global drive for sustainability, addressing the need for novel chemical engineering and biotechnology processes and materials.

In engineering, a process is a series of interrelated tasks that, together, transform inputs into outputs. These tasks may be carried out by people, nature or machines using various resources; an engineering process must be considered in the context of the agents carrying out the tasks and the resource attributes involved. Systems engineering normative documents and those related to Maturity ...

Chemical thermodynamics is the study of the interrelation of heat and work with chemical reactions or with physical changes of state within the confines of the laws of thermodynamics. Chemical thermodynamics involves not only laboratory measurements of various thermodynamic properties, but also the application of mathematical methods to the study of chemical questions and the spontaneity of ...
