This is a list of notable chemical engineers, people who studied or practiced chemical engineering. The main list is those who achieved status in chemical engineering or a closely related field such as management or science. At the foot of the page is a list of people with chemical engineering qualifications who are notable for other reasons, such as actors, sportspeople and authors.

Most concrete produced today includes either chemical additions to the cement, chemical admixtures in the concrete, or both. These chemicals alter a number of properties of cementitious systems, including hydration behavior, and it has been long understood by practitioners that these systems can differ widely in response to such chemicals.

Pinecone's second law: Assuming a techlevel more advanced than nearfuture (i.e. interstellar -or- extremely cheap interplanetary travel exists), there will exist no true warship which will not ALSO be capable of single-handedly exterminating an entire continent, be it via nukes, kinetics or handwavium bombs. Corollary: If you are able to intercept and kill another warship across a star system ...
