Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.

Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.

(2) Although a longtime collector and curator of maps and atlases, I am a relative newcomer to Geography and Holocaust Research. Like many students I started with Martin Gilbert's Atlas of the Holocaust, because of its reliability and completeness. I show you a poignant example. This map locates the beginnings of 'the holocaust by bullets': Jews massacred between 22 June and 16 July 1941.
