Strategic Analysis of the Pharma Market, Future Revenue

Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

Global warming - Wikipedia

We present a composition-based logic toward international expansion by emerging market firms (EMFs) â€œ firms that use compositional investment, compositional competition, and compositional collaboration to create a unique competitive advantage in global competition. This view explains how EMFs creatively adopt a composition-based international strategy, enabling them to compensate for their ...

Contextualizing international strategy by emerging market
