

epistemology and cognition pdf

Constructivist epistemology is a branch in philosophy of science maintaining that scientific knowledge is constructed by the scientific community, who seek to measure and construct models of the natural world. Natural science therefore consists of mental constructs that aim to explain sensory experience and measurements.. According to constructivists, the world is independent of human minds ...

Enactivism argues that cognition arises through a dynamic interaction between an acting organism and its environment. It claims that our environment is one which we selectively create through our capacities to interact with the world. " Organisms do not passively receive information from their environments, which they then translate into internal representations.
