HSE Health & Safety Executive Further development of the usability and validity of the Quick Exposure Check (QEC) Prepared by University of Surrey for the Health and Safety Executive 2005

RESEARCH REPORT 211 - Health and Safety Executive

This systematic review explored associations between smoking and health outcomes involving the musculoskeletal system. AMSTAR criteria were followed. A comprehensive search of PubMed, Web of Science, and Science Direct returned 243 articles meeting inclusion criteria. A majority of studies found smoking has negative effects on the musculoskeletal system.

The Effect of Tobacco Smoking on Musculoskeletal Health: A

This study reports a combined use of ordinary Fourier transform infrared spectroscopy (FT-IR) in conjunction with partial-least-squares (PLS) multivariate regression for accurate determination of the percent compositions of four essential oils (EOs) (wintergreen, tea tree, rosemary, and lemon eucalyptus oils) that were adulterated either with lemongrass essential oil or peppermint essential oil.

Purity Analysis of Adulterated Essential Oils by FT-IR

Multidetector CT/CTA What is Multidetector CT/CTA? Multidetector computed tomography (MDCT) is a form of computed tomography

Mouthwash, mouth rinse, oral rinse, or mouth bath is a liquid which is held in the mouth passively or swilled around the mouth by contraction of the perioral muscles and/or movement of the head, and may be gargled, where the head is tilted back and the liquid bubbled at the back of the mouth.. Usually mouthwashes are antiseptic solutions intended to reduce the microbial load in the oral cavity ...

Magnetic resonance imaging (MRI) is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body in both health and disease. MRI scanners use strong magnetic fields, magnetic field gradients, and radio waves to generate images of the organs in the body. MRI does not involve X-rays or the use of ionizing radiation, which distinguishes ...

A literature review for clinical information extraction applications. 1917 publications were identified for title and abstract screening. 263 publications fully reviewed.

Clinical information extraction applications: A literature

Although a substantial body of literature has explored the relationship between sleep and exercise, comprehensive reviews and definitive conclusions about the impact of exercise interventions on sleep are lacking. Electronic databases were searched for articles published between January 2013 and March 2017. Studies were included if they possessed either objective or subjective measures of ...

INTRODUCTION: While new studies on the negative effects of pesticides on human health are completed each year by major government and university research centers, the majority of these studies remain "silent" in medical journals and do not reach the public via major news outlets. This reduction in public awareness appears to have worsened over the past several decades.

Pesticide Health Effects: Home, Lawn, Agriculture, Schools

Open Access journals are the major source of knowledge for young and aspiring generations who are keen in pursuing a career in sciences. This system provides easy access to networks of scientific journals. Authors that contribute their scholarly works to Open Access journals gain remarkable reputation as the research scholars explore these works extensively.
