In the context of human society, a family (from Latin: familia) is a group of people related either by consanguinity (by recognized birth), affinity (by marriage or other relationship), or co-residence (as implied by the etymology of the English word "family") [citation needed] or some combination of these. [citation needed] Members of the immediate family may include spouses, parents ...

Starlite is a material claimed to be able to withstand and insulate from extreme heat. It was invented by British amateur chemist and hairdresser Maurice Ward during the 1970s and 1980s, and received significant publicity after coverage of the material aired in 1990 on the BBC science and technology show Tomorrow's World. The name Starlite was coined by Ward's granddaughter Kimberly.

The paper provides a brief overview of the research literature on the impacts of family structure and family change on child outcomes, with a particular focus on parental separation. It takes as a starting point the existence of pervasive associations between family change and child outcomes and addresses a range of issues that are examined in the research literature.

The Impact of Family Structure and Family change on Child

3 offs between alternative definition types.¹ We chose to vary definition types by adding or removing specific conditions or keywords commonly used in the household definition to test the effect of those requirements on household composition and statistics.
