Flight dynamics characterizes the motion of a flight vehicle in the atmosphere. As such, it can be considered a branch of systems dynamics in which the system studied is a flight vehicle. The response of the vehicle to aerodynamic, propulsive, and gravitational forces, and to control inputs from the

Quadcopter Dynamics, Simulation, and Control Introduction ... In order to properly model the dynamics of the system, we need an understanding of the physical properties that govern it. We will begin with a description of the motors being used for our quadcopter, and then use energy considerations to derive the forces and thrusts that ...
