Fuel injection is the introduction of fuel in an internal combustion engine, most commonly automotive engines, by the means of an injector.. All diesel engines use fuel injection by design. Petrol engines can use gasoline direct injection, where the fuel is directly delivered into the combustion chamber, or indirect injection where the fuel is mixed with air before the intake stroke.

Gasoline, gas (American English) or petrol (British English) is a colorless petroleum-derived flammable liquid that is used primarily as a fuel in spark-ignited internal combustion engines. It consists mostly of organic compounds obtained by the fractional distillation of petroleum, enhanced with a variety of additives. On average, a 42-U.S.-gallon (160-liter) barrel of crude oil yields about 19 ...

Fuel System. For fuel system troubleshooting & DIY guides and tips, please refer to the individual fuel system sections. Note: "CIS" has been replaced throughout this website with "K-Jetronic". K-Jetronic is the system's actual name (used everywhere outside North America), which is one type of continuous injection system.

Highlights Higher ethanol blend levels are projected for US gasoline. Ethanol has greater Research Octane Number (RON) and heat of vaporization (HoV) than gasoline. Linear molar octane blending model is used to quantify RON potential from ethanol and blendstock. Cooling octane from fuel evaporation in DI engines is estimated. Future engine efficiency increases are enabled by increased knock ...

Eric comments (by email): these patents are long since expired - if they really work, anyone could reproduce them. About 20 countries in the world can make cars, I see no reason none of them would want to totally take over the trillion dollar car marketplace and have a balanced budget by not having to pay for oil

Introduction. Vegetable oil can be used as diesel fuel just as it is, without being converted to biodiesel. The downside is that straight vegetable oil (SVO) is much more viscous (thicker) than conventional diesel fuel or biodiesel, and it doesn't burn the same in the engine -- many studies have found that it can damage engines.
