Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.

Mathematical logic - Wikipedia

It may seem that the more you read about homeschooling and the more suppliers' websites you visit, the more confusing it all gets. But it is very helpful to gather all the information you can.
