Geoprofessions is a term coined by the Geoprofessional Business Association to connote various technical disciplines that involve engineering, earth and environmental services applied to below-ground (â€™subsurfaceâ€™), ground-surface, and ground-surface-connected conditions, structures, or formations. The principal disciplines include, as major categories:

Engineering ethics is the field of system of moral principles that apply to the practice of engineering. The field examines and sets the obligations by engineers to society, to their clients, and to the profession. As a scholarly discipline, it is closely related to subjects such as the philosophy of science, the philosophy of engineering, and the ethics of technology

1. Introduction. Ground or rock anchors (sometimes referred to as anchorages) of a number of types have long been used for a range of purposes in rock engineering and in geotechnical engineering more generally (Hobst and Zaj<sup>Ã</sup>-c, 1977, Hanna, 1982, Habib, 1989, Xanthakos, 1991, Littlejohn, 1993, Littlejohn, 1997). Rock anchors are capable of transmitting an applied tensile load to the rock mass ...
