Mobile backend as a service (MBaaS), also known as "backend as a service" (BaaS), is a model for providing web app and mobile app developers with a way to link their applications to backend cloud storage and APIs exposed by back end applications while also providing features such as user management, push notifications, and integration with social networking services.

Mobile backend as a service - Wikipedia

A little while back I found myself needing to handle file uploads without touching the application server. This is a common scenario for people using Heroku as they limit all requests to 30 seconds, which in theory sounds fine for most requests, but destroys any chance you have at directly handling file uploads within your application.

Uploading To S3 With AngularJS - Cheyne Wallace

PostgreSQL, often simply Postgres, is an object-relational database management system (ORDBMS) with an emphasis on extensibility and standards compliance. It can handle workloads ranging from small single-machine applications to large Internet-facing applications (or for data warehousing) with many concurrent users; on macOS Server, PostgreSQL is the default database; and it is also available ...

Ether Calc EtherCalc is a web spreadsheet. Your data is saved on the web, and people can edit the same document at the same time. Everybody's changes are instantly reflected on all screens.

EtherCalc

Why was Python 3 made incompatible with Python 2? According to Guido, he initiated the Python 3 project to clean up a variety of issues with Python 2 where he didn't feel comfortable with fixing them through the normal deprecation process.

Python 3 Q & A - Nick Coghlan's Python Notes 1.0 documentation

Google's Chrome browser has a useful translate feature, where it detects the language of the page you've visited and if it differs from your local language, it offers to translate it. Wonderfully, Google has open-sourced most of Chrome's source code, including the embedded CLD (Compact Language Detector) library that's used to detect the language of any UTF-8 encoded content.

Changing Bits: Language detection with Google's Compact

The term "Microservice Architecture" has sprung up over the last few years to describe a particular way of designing software applications as suites of independently deployable ...
