And though we may find it amazing to observe, we mostly aren't afraid that a lunar eclipse is a bad omen "except for those who believe a blood-moon prophecy in the Bible predicts the end of days.

### **Lunar eclipse July 27: The terrifying history of blood**

Solar eclipses can only occur during a New Moon when the Moon moves between Earth and the Sun and the 3 celestial bodies form a straight line: Earth-Moon-Sun.. There are between 2 and 5 solar eclipses every year.. There are 3 kinds of solar eclipses: total, partial, and annular. There is also a rare hybrid that is a combination of an annular and a total eclipse.

solar eclipse. The same is true for lunar eclipses: most months, the lunar orbit carries the moon above or below the shadow of the Earth, and there is no lunar eclipse. Solar eclipses happen when the new moon occurs near a node of the lunar orbit. Likewise, lunar eclipses happen when a full moon occurs near a node.
