Prehistoric medicine is any use of medicine from before the invention of writing and the documented history of medicine. Because the timing of the invention of writing varies per culture and region, the term "prehistoric medicine" encompasses a wide range of time periods and dates.. The study of prehistoric medicine relies heavily on artifacts and human remains, and on anthropology.

Euthanasia is when a person's life is ended because of disease or pain, which has made them suffer. This is different from assisted suicide, where a person helps someone kill themselves. It is also different to murder, where the reason is not suffering, but to kill for the killer's own ends. Euthanasia can be voluntary, where the person who dies asks for help in ending their life.
