While their subject was kept isolated, the examiners read the test material several times and took notes on its contents. They then placed two pages of the material in front of her to calculate her reading speed. The result was astounding. She apparently read 1,390 words in a fifth of a second – the time it takes to blink one’s eyes.

output will be exam anxiety or exam confidence (or perhaps somewhere in the middle) depending on the individual. Generally, anxiety and studying for exams do not go well together. However, according to Csikszentmihalyi (1990) a low level of anxiety, combined with focus and heightened awareness are components of a “flow” state.
