The MCAT is changing in 2015. With the addition of three semesters’ worth of material, more advanced critical thinking skills, a longer duration, and changes in Physics content, the new exam requires even more diligent prep with resources from Kaplan Test Prep.

Kaplan MCAT Physics and Math Review: Created for MCAT 2015

Chemistry is physics. Physics is life. Not surprisingly, this was the claim of a physics professor. Walking into MCAT preparation, many students think of physics as the least applicable science to medicine, reflecting on calculus-heavy premedical classes. But even in the medical field, physics is all around us.

MCAT Practice Questions: Physics - Kaplan Test Prep

While it might seem that most of the MCAT math-based questions will be in the Chemical and Physical Foundations of Biological Systems section of the test, there can be questions requiring you to perform calculations, work with statistics or manipulate experimental data in the other science sections as well.

Ballistic Pendulum. A red sphere (of mass m) and a blue sphere (of mass $5m$) are attached to the ceiling by massless strings of identical length forming twin pendulums of length L . The red sphere is drawn to the left so that its center of mass has been raised a distance h and is then released. As the red sphere moves back through equilibrium it hits and adheres to the blue sphere.

Physics Practice for MCAT

The first question many people ask is, $\hat{=}$ when should I take the MCAT? $\hat{=}$ •The general guideline is to take

the MCAT the year before you plan to enter medical school. For example, the class of 2018 should take the MCAT sometime before or during the spring/summer of 2013. Your basic science coursework should be complete by this point.
