Python is an interpreted, high-level, general-purpose programming language. Created by Guido van Rossum and first released in 1991, Python has a design philosophy that emphasizes code readability, notably using significant whitespace. It provides constructs that enable clear programming on both small and large scales. In July 2018, Van Rossum stepped down as the leader in the language community.

PyPy is an alternative implementation of the Python programming language to CPython, which is the standard implementation of Python. PyPy often runs faster than CPython, because PyPy is a just-in-time compiler, while CPython is an interpreter. Most Python code runs well on PyPy, except for code that depends on CPython extensions, which either does not work or incurs some overhead when run in PyPy.
